

Project: Tara Anglican School for Girls

Project Description

KAE undertook the Electrical and Mechanical design for the extension and refurbishment of the Senior Learning Centre and Administration Building.

Scope of Services

The Electrical services consisted of lighting, power, communications, security, lift and fire documentation which was carefully designed to provide a successful learning and schooling environment. The augmentation of the existing main switchboard and the implementation of new distribution boards, rewiring existing circuits where applicable, were required to satisfy the building works.

The Mechanical services consisted of new air conditioning & ventilation systems.
