

**Project: University of Sydney – Anderson Stuart Building**

**Project Description**

KAE undertook the Electrical and Mechanical design for the refurbishment of the existing laboratories, offices and computer rooms.

**Scope of Services**

The electrical works were specifically designed to upgrade the rooms to enhance the teaching and learning facilities in each room. This included data and power provisions for computer rooms and laboratories and conversion of store rooms to offices.

Mechanical services design required providing Air Conditioning units to accommodate the refurbished rooms and the increase of student capacity and electrical equipment.
